PROJECTS

1. CLOSET

Created a website replicating Diesel's functionality, an online retail platform specializing in clothing and accessories.

Features:
- User authentication to ensure secure access for registered users.
- Products displaying feature to showcase a wide range of clothing and accessories.
- Ability to add products to a cart for convenient online shopping. Checkout page for seamless and secure payment processing.

Tech stack: HTML, CSS, JavaScript.

Nature and Duration: Successfully completed a solo project within a duration of 5 days.

2. Ethical Threads

The website, Ethical Threads, aims to provide an online platform for clothing shopping, drawing inspiration from American Eagle.

Features:
- User authentication
- Sorting and filtering
- Product page
- Payment page Search bar

Areas of Responsibility:
- Developed the product page, ensuring a seamless and visually appealing user experience.
- Implemented the functionality for displaying single product details, enabling customers to access comprehensive information.
- Created the feature for adding products to the cart

Tech Stack: HTML, CSS, JavaScript

Nature and Duration: Collaborative project with 5 members, completed in 5 days.
